Hot Mess: dated development and release record

Love Wins Media, Inc. (D-U-N-S 14-049-9305) · App: **Hot Mess**, Apple ID 1195758383 · Compiled 7 Nov 2026 (UTC)

This pack lists when Hot Mess and its features were built and released. For each date it says who holds the record. Records kept by Apple or GitHub are on their servers, so they don't depend on our own computers. Git author dates and file dates are recorded by us, so we give them as supporting detail only.

1. Records Apple holds

Apple's own logs are the authority for these. The dates below are from our release notes and should match them.

What	Date (UTC)	Notes
App Store Connect app record, Apple ID 1195758383	Apple's record	We believe it dates from the first release in early 2017 (see §3)
Version 2.0 live on the App Store	19 Oct 2026	Same day as Google Play
Version 2.2: TestFlight build 420511, submitted for review	22 Oct 2026 (in review by about 05:40)	
Version 2.3: Xcode Cloud build 420514, processed as valid	23 Oct 2026, 19:41	
Version 2.4: submitted for App Review	25 Oct 2026, about 05:32	
Version 2.5: App Store build 420526 (main d4e240b)	Built after the 2.5 release cut on 31 Oct 2026	Builds 420520–420525 were beta builds from the next branch
TestFlight public beta poster (QR code to TestFlight)	Poster file dated 17 Oct 2026	

2. GitHub server timestamps (public pull requests)

These come from GitHub's API (the PR's created_at and merged_at). Each merge commit is signed by GitHub's own key.

The hot_mess_ios history before 2018 has 112 commits. Full commit and tree hashes for the key commits are in `repo-anchors/key-commits.tsv`.

4. Dated poster files

These files are in the project’s shared folder. The dates are file modification times, which we record ourselves.

Date (UTC)	File
2026-10-17 19:04	posters/testflight/hot-mess-testflight-poster.pdf (+ HTML, PNG, build scripts)
2026-10-18 17:51	hot-mess-android-beta-poster.pdf

Date (UTC)	File
2026-10-18 18:07	staff-beta-poster/audiencekit-staff-beta-poster.pdf
2026-10-19 23:58	hot-mess-download-poster/hot-mess-download-poster.pdf
2026-10-20 01:01	staff-app-posters/ (Velvet, Backstage posters)
2026-10-21 22:55	poster-generator/hot-mess-poster-studio.html

The full list with sizes is in `poster-file-dates.tsv`, and the SHA-256 hashes are in `project-files.sha256`.

5. Integrity anchors

- `project-files.sha256` holds SHA-256 hashes of every poster file above.
- `repo-anchors/main-archives.sha256` holds the SHA-256 of `git archive` of the main branch of each repository on 7 Nov 2026 (hot_mess_ios, hot_mess_android, hotmess.social, audience_kit_api, audience-kit, staff-kit, audience-kit-sdk).
- `MANIFEST.sha256` hashes every file in this bundle. Timestamping it with OpenTimestamps and an RFC 3161 time-stamp authority (`stamp.sh`) proves the bundle existed on that date.
- **How to check without trusting us:** read the PR timestamps straight from GitHub (for example `https://api.github.com/repos/lwm-luminx/hotmess.social/pulls/29`), ask Apple for the App Store Connect dates, and run `ots verify MANIFEST.sha256.ots`.

Appendix: App Review timeline for Hot Mess, Focus, Velvet and Backstage

One timeline of every App Store submission, App Review decision and message, our replies, and the changes in between (new versions, new builds, withdrawn submissions), compiled 13 Nov 2026 from App Store Connect for Love Wins Media, Inc. Times are UTC. App Store Connect keeps about the last 180 days of submissions; the 2017–2018 Hot Mess entries are its version and build records. "Approved" is when App Store Connect completed the approved submission.

Submitted sent to App Review **App Review** a rejection or question, with the guidelines cited **Our reply** in Resolution Center **Approved** Change: version, build or withdrawal
