Hot Mess: dated development and release record

Love Wins Media, Inc. (D-U-N-S 14-049-9305) · App: **Hot Mess**, Apple ID 1195758383 · Compiled 7 Nov 2026 (UTC)

This pack lists when Hot Mess and its features were built and released. For each date it says who holds the record. Records kept by Apple or GitHub are on their servers, so they don't depend on our own computers. Git author dates and file dates are recorded by us, so we give them as supporting detail only.

1. Records Apple holds

Apple's own logs are the authority for these. The dates below are from our release notes and should match them.

What	Date (UTC)	Notes
App Store Connect app record, Apple ID 1195758383	Apple's record	We believe it dates from the first release in early 2017 (see §3)
Version 2.0 live on the App Store	19 Oct 2026	Same day as Google Play
Version 2.2: TestFlight build 420511, submitted for review	22 Oct 2026 (in review by about 05:40)	
Version 2.3: Xcode Cloud build 420514, processed as valid	23 Oct 2026, 19:41	
Version 2.4: submitted for App Review	25 Oct 2026, about 05:32	
Version 2.5: App Store build 420526 (main d4e240b)	Built after the 2.5 release cut on 31 Oct 2026	Builds 420520–420525 were beta builds from the next branch
TestFlight public beta poster (QR code to TestFlight)	Poster file dated 17 Oct 2026	

2. GitHub server timestamps (public pull requests)

These come from GitHub's API (the PR's created_at and merged_at). Each merge commit is signed by GitHub's own key.

2026-10-06	hotmess.social	a26fc32	Website scaffold
2026-10-07	hot_mess_ios	ea709f8	Events on a four-week calendar

The hot_mess_ios history before 2018 has 112 commits. Full commit and tree hashes for the key commits are in `repo-anchors/key-commits.tsv`.

4. Dated poster files

These files are in the project’s shared folder. The dates are file modification times, which we record ourselves.

Date (UTC)	File
2026-10-17 19:04	posters/testflight/hot-mess-testflight-poster.pdf (+ HTML, PNG, build scripts)
2026-10-18 17:51	hot-mess-android-beta-poster.pdf

Date (UTC)	File
2026-10-18 18:07	staff-beta-poster/audiencekit-staff-beta-poster.pdf
2026-10-19 23:58	hot-mess-download-poster/hot-mess-download-poster.pdf
2026-10-20 01:01	staff-app-posters/ (Velvet, Backstage posters)
2026-10-21 22:55	poster-generator/hot-mess-poster-studio.html

The full list with sizes is in `poster-file-dates.tsv`, and the SHA-256 hashes are in `project-files.sha256`.

5. Integrity anchors

- `project-files.sha256` holds SHA-256 hashes of every poster file above.
- `repo-anchors/main-archives.sha256` holds the SHA-256 of `git archive` of the main branch of each repository on 7 Nov 2026 (hot_mess_ios, hot_mess_android, hotmess.social, audience_kit_api, audience-kit, staff-kit, audience-kit-sdk).
- `MANIFEST.sha256` hashes every file in this bundle. Timestamping it with OpenTimestamps and an RFC 3161 time-stamp authority (`stamp.sh`) proves the bundle existed on that date.
- **How to check without trusting us:** read the PR timestamps straight from GitHub (for example `https://api.github.com/repos/lwm-luminx/hotmess.social/pulls/29`), ask Apple for the App Store Connect dates, and run `ots verify MANIFEST.sha256.ots`.

Appendix: App Review history for Hot Mess, Focus, Velvet and Backstage

Compiled 13 Nov 2026 from App Store Connect (Love Wins Media, Inc.): each app's review submissions, the outcome of each, and the dates and guideline citations of App Review's messages in Resolution Center. Times are UTC. These are Apple's records; App Store Connect keeps the submissions of roughly the last 180 days. Earlier Hot Mess versions are dated by their App Store Connect version records. "Removed" means we withdrew that submission, usually to resubmit a new build.

Hot Mess (Apple ID 1195758383): guest app, on the App Store since 2017

Date (UTC)	Version	Event
16 Jan 2017	1.0	Version record created; first release.
16 May 2017	1.1	Version record created.
22 May 2017	1.2	Version record created; released.
26 Mar 2018	2.0.1	Version record created (later used for the 2026 relaunch).
14 Oct 2026 06:04	2.0.1	**App Review: 2.5.4 (background modes) and 2.1 (app completeness).**
14 Oct 2026 07:27	2.0.1	We replied on both items and submitted a new build. (Removed when the next build replaced it.)
15 Oct 2026 02:57	2.0.1	**App Review: 1.2 (user-generated content) and 5.1.1(v) (account sign-in).**
15–17 Oct 2026	2.0.1	We replied, and listed each 1.2 precaution in build 420200, starting with the EULA and content filtering.
16 Oct 2026 06:48	2.0.1	**App Review: 1.2 precautions still not all located.**
18 Oct 2026 03:45	2.0.1	**App Review: 5.1.1(v).**
18–19 Oct 2026	2.0.1	We asked App Review to reconsider 5.1.1(v), explaining the membership and EULA model; App Review replied on 19 Oct (05:08).
19 Oct 2026 17:32	2.0.1	**Submitted; approved.**
21 Oct 2026 04:12	2.1	**Submitted; approved.**
22 Oct 2026 04:42	2.2	**Submitted; approved.**
23 Oct 2026 21:13	2.3	**Submitted; approved.**
25 Oct 2026 05:25	2.4	**Submitted; approved.**
3 Nov 2026 01:54	2.5	**Submitted; approved.**
8 Nov 2026 05:01	2.6	**Submitted; approved.**

Focus by AudienceKit (Apple ID 6821187977): the scene's administrators

Date (UTC)	Version	Event
9 Oct 2026	1.0.0	Version record created.
13–14 Oct 2026	1.0.0	Submitted twice; both removed for newer builds.
20 Oct 2026 16:48	1.0.0	**App Review: 2.1 (app completeness): the review sign-in didn't work.**
20 Oct 2026 17:35	1.0.0	We explained that the App Review code shared with Hot Mess had been rotated for Hot Mess's own review.
22 Oct 2026 03:24	1.0.0	**Submitted; approved.**
25 Oct 2026 17:42	1.6	**Submitted; approved.**
3 Nov 2026 01:47	1.8	**Submitted; approved.**
8 Nov 2026 00:27	1.9	**Submitted; approved.**

Backstage by AudienceKit (Apple ID 6821187736): performers and hosts

Date (UTC)	Version	Event
9 Oct 2026	1.0.0	Version record created.
13–14 Oct 2026	1.0.0	Submitted three times; all removed for newer builds.
20 Oct 2026 16:59	1.0.0	**App Review: 2.1 (app completeness) and 5.1.1 (data collection and storage).**
20 Oct 2026 17:37	1.0.0	We replied on both points, including that the App Review code shared with Hot Mess had been rotated for Hot Mess's own review.
21 Oct 2026 14:45	1.0.0	Submitted; removed for a newer build.
22 Oct 2026 04:32	1.0.0	**Submitted; approved.**
26 Oct 2026 18:17	1.6	**Submitted; approved.**

8 Nov 2026 00:28	1.9	**Submitted; approved.**

Velvet by AudienceKit (Apple ID 6820764256): a venue's staff

Date (UTC)	Version	Event
8 Oct 2026	1.8	Version record created (TestFlight from the same day).
13–14 Oct 2026	1.8	Submitted three times; all removed for newer builds.
21 Oct 2026 15:39	1.8	**App Review: 2.1 (app completeness).**
23 Oct 2026 12:26	1.8	**App Review: 2.1 information request about the business model.**
23 Oct 2026 14:55	1.8	We replied: Velvet sells nothing; its only payments are guests' cover charges for physical entry, paid to the venue's own Stripe or Square account.
23 and 28 Oct 2026	1.8	Resubmitted with new builds; each later removed for a newer build.
5 Nov 2026 22:25	1.8	**App Review: 2.5.4 (background audio for the venue display) and 2.1 (comment moderation and blocking).**
5–6 Nov 2026	1.8	We replied on 2.1, and added synthetic demo comments so the moderation could be verified.
6 Nov 2026 01:07	1.8	Submitted build 430056, adding "Ban from venue…" on comments as committed.
13 Nov 2026 19:53	1.8	**App Review: 4.3 (spam) and 4.2.6 (app generation services); asked nine questions.**
13 Nov 2026 23:23	1.8	We replied in Resolution Center with answers and a step-by-step PDF of one night across our apps (hotmess.social/record/velvet-app-review.pdf).

Velvet is also on Google Play (com.audiencekit.Velvet): in testing from 18 Oct 2026 and in production since 7 Nov 2026, with no policy issues.
